

DASIC AEROKLEEN[®] ACC **Aircraft cabin cleaner concentrate**

- † Easy removal of difficult stains
- † Low foaming for fast spray on/wipe off application
- † Pleasant perfume
- † No rinsing required
- † Biodegradable according to Regulation (EC) No. 648/2004
- † Approved for aircraft use

DASIC AEROKLEEN ACC is an aircraft cabin cleaner concentrate, formulated to remove obdurate soiling from interior cabin surfaces. **DASIC AEROKLEEN ACC** contains a mild perfume leaving a pleasant but unobtrusive odour.

APPLICATION

DASIC AEROKLEEN ACC may be used as a very effective stand alone heavy duty cleaner on polycarbonate surfaces including cabin walls, luggage bins, seat backs etc. Effective removal of moderate soiling a dilution rate of 1 part **DASIC AEROKLEEN ACC** to 20 parts water has been found effective.

For heavy/difficult to remove soiling a dilution rate of 1 part **DASIC AEROKLEEN ACC** to 10 parts water is recommended. Application by cloth, brush or spray, followed by a suitable contact time before removing dissolved deposits with a damp cloth is effective in obtaining a streak free clean surface.

DASIC AEROKLEEN ACC may be used in conjunction with a sanitizing product such as **DASIC AEROKLEEN ACS** concentrate or **DASIC AEROKLEEN 56XX** ready to use formulation for food preparation areas.

Following a suitable contact time, the dissolved deposits may be removed with a damp cloth without streaking. Agitation using **FLOTEX** 4 x 4 scrubbing pads (available from Dasic International Ltd) accelerates the removal of ingrained soiling on matt or dimpled surfaces (food trays, polycarbonate seat backs etc) prior to removal of the dissolved deposits with a damp cloth.
